information.

About the way we use and reuse the resources in the building industry and ultimately eliminate the concept of waste. The book seeks to provide inspiration for 'building a circular future' by providing a set of principles and bringing forward the best practices from in and outside the building industry. This book presents findings, case studies, background and context for the project 'Building a Circular Future', and consist of three main chapters: Design for Disassembly, Material Passport and Circular Economy. All content comes from extensive research and through workshops with partners across industries. The book furthermore provides 15 principles for "Building a Circular Future" and a thoroughly calculated business case, which documents that a demolition, that today would cost \$2.151.249,56 can be turned into a \$4.705.858,41 business upside in a future circular building industry.

Vols. for 1970-71 includes manufacturers' catalogs.

This is a reproduction of the 1984 Department of the Army Field Manual 100-2-3 (The Soviet Army: Troops, Organization, and Equipment). In its day, it - along with its sister publications FM 100-2-1 and 100-2-2 - was the "definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare." St. Michael Publishing House has re-printed these so that the military scholar and student of history may learn from other nation's way of war.
