What is Exploratory Research? Types of Exploratory ...

Exploratory research: Definition.

Exploratory research is defined as a research used to investigate a problem which is not clearly defined.

It is conducted to have a better understanding of the existing problem, but will not provide conclusive results. For such a research, a researcher starts with a general idea and uses this research as a medium to identify issues, that can be the focus for future research.

Exploratory Research: Definition, Methods, Types and ...

An exploratory research project is an attempt to lay the groundwork that will lead to future studies or to determine if what is being observed might be explained by a currently

existing theory. Most often, exploratory research lays the initial groundwork for future research.

Research Methodology: Exploratory, Descriptive and ...

Exploratory research, as the name implies, intends merely to explore the research questions and does not intend to offer final and conclusive solutions to existing problems. This type of research is usually conducted to study a problem that has not been clearly defined yet. Conducted in order to determine the nature of the problem, exploratory research is not intended to provide conclusive evidence, but helps us to have a better understanding of the problem.
