Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. “ Dr. Phil, ” along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

The definitive, fully illustrated celebration of an auto manufacturer that paved its own way by going off-road is now updated to celebrate Jeep ’ s 80th anniversary. Few American vehicles, or vehicles made anywhere else in the world for that matter, are as universally iconic as the Jeep. From olive drab WWII military relics to the beloved Wrangler with its rear-mounted spare tire, open-air design, and telltale roll cage, the Jeep is a true classic. In *Jeep: Eight Decades from Willys to Wrangler*, automotive writer Patrick R. Foster chronicles Jeep vehicle design and production from the beginning of World War II to present. Beginning with the Jeep as a crucial component of the American war fleet, Foster expertly recounts the corporate shifts, financial struggles and successes, close calls, and, above all, the enduring machines that have carried Jeep from the early 1940s to its triumphant role as a modern-day embodiment of American perseverance. More than 200 color and black-and-white historical photos and period advertisements complement his expertly written narrative of Jeep's entire history, now updated to include five years of new model editions and prototypes, its return to the pickup market, and recent stunning marketplace successes. The resulting book reminds us that sometimes the road less traveled was just waiting for the right truck.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada ' s automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler ' s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz — rich cars, poor quality. There ' s only one Saturn you should buy. Toyota — enough apologies: "when you mess up, ' fess up."
