Performing Interdisciplinarily proposes new ways of engaging with performance as it crosses, collides with, integrates and/or disturbs other disciplinary concerns. From Activism and Political Philosophy to Cognitive Science and Forensics, each chapter explores the relationships between performance and another discipline. Including cross-chapter discussions which address the intersections between fields, Performing Interdisciplinarily truly examines the making of meaning across disciplinary conventions. This is a volume for performance practitioners and scholars who are living, learning, writing, teaching, making and thinking at the edges of their specialisms.
