While the Internet is a relatively new technology, that has impacted the world, and provided many benefits, it has also had negative ramifications. Individuals unable to control their use are jeopardizing school, employment and relationships. The concept of "Internet Addiction" is used to explain uncontrollable, damaging use of technology. It is characterized as an impulse control disorder, comparable to pathological gambling, because of overlapping diagnostic criteria and symptomatology. Based on these studies, the IAT was constructed to capture the problematic behavior associated with compulsive use of technology, including online porn, internet gambling and compulsive use of online games and social media. The Internet Addiction Test emerged as the first validated measure of Internet and technology addiction. The assessments can be administered in a variety of mental health settings, including private practice clinics, schools, hospitals and residential programs. They can be used when there is suspicion of Internet addiction, as part of a broad intake assessment, or for use in a wellness curriculum to help participants evaluate their own Internet behavior. The IAT can also be a valuable pre-employment screening device, to detect internet addiction among job candidates, to improve productivity and reduce corporate liability. Based on 20 self-report items, the IAT assesses for the presence of addiction to the Internet, electronic entertainment, social media, and general use of

## File Type PDF Pengukuran Sikap Mia Azwar

electronic devices, and also measures the severity of addiction, in terms of mild, moderate or severe. Furthermore, because Internet addiction may be driven by different reasons and manifest in different ways, requiring different types of treatment, the IAT produces scores related to the following areas: EscapeCompulsionNeglecting dutiesAnticipationLack of ControlSocial Avoidance

A look at the role of resilience in promoting a happy and healthy life introduces seven proven techniques for developing the capacity for coping with the challenges and setbacks of life, from self-criticism and negative self-images to crises, anxiety, and grief. Reprint.

Originally published in 1969, this book deals extensively with the description and measurement of personality. Beginning with a statement of the principles of typological research in psychology, set against the background of general taxonomic principles in biology, the study discusses in detail results and generalisations from the Eysencks' previous work. The second part of the book describes several large-scale studies using personality questionnaires prepared by the authors, as well as the standard ones of Cattell and Guilford. There is a comparative study of the Eysenck, Cattell and Guilford inventories, which analyses the degree to which similar factors can be found in these three instruments and discusses areas of agreement and disagreement between the three authors. The third part deals with personality studies in children, and includes a chapter on personality structure in subnormal subjects. These studies are concerned with discovering the extent to which personality structure changes with increasing age, and to what extent it is possible to measure personality in younger children. They also examine sex differences in personality structure, and show quite marked differences between the sexes on a number of primary personality traits. The results of the Eysencks' work in this field directed new light on the

structure of personality and cast doubt on many widely accepted findings of the time.

This annual publication is devoted to the advancement of ethics research and education in the profession and practice of accounting. It aims to advance innovative and applied ethics research in all accounting-related disciplines on a global basis and to improve ethics education in the field.

Modern Auditing has become established as one of the leading textbooks for students taking university and professional courses in auditing. This extensively revised third edition continues to provide the reader with a comprehensive and integrated coverage of the latest developments in the environment and methodology of auditing. Aimed at introductory level courses in auditing at undergraduate, graduate and professional levels, it develops the auditing process in a logical and sequential manner enabling the reader to progressively consolidate their understanding of the concepts and process. The book contains a strong pedagogical framework including: chapter overviews, learning objectives and checks, review questions, professional application questions, case studies and a glossary of technical terms. New features include: Updated coverage of developments in companies legislation, regulation and corporate governance Discussion of new developments in ethical codes Coverage of the latest audit risk standards and the impact of the IAASB's Clarity Project Focus on changes in professional statements and structure and the increasing influence of IFAC

Presenting the most comprehensive and lucid account of the topic currently available, Robert Audi's "Practical Reasoning and Ethical Decision" is essential reading for anyone interested in the role of reason in ethics or the nature of human action. The first part of the book is a detailed critical overview of

## File Type PDF Pengukuran Sikap Mia Azwar

the influential theories of practical reasoning found in Aristotle, Hume and Kant, whilst the second part examines practical reasoning in the light of important topics in moral psychology - weakness of will, self-deception, rationalization and others. In the third part, Audi describes the role of moral principles in practical reasoning and clarifies the way practical reasoning underlies ethical decisions. He formulates a comprehensive set of concrete ethical principles, explains how they apply to reasoning about what to do, and shows how practical reasoning guides moral conduct.

The specific and varied ways in which assessment and evaluation can impact learning and teaching have become an important language education research concern, particularly as educators are increasingly called on to implement these processes for improvement, accountability, or curricular development purposes. Useful Assessment and Evaluation in Language Education showcases contemporary research that explores innovative uses of assessment and evaluation in a variety of educational contexts. Divided into three parts, this volume first examines theoretical considerations and practical implementations of assessment conducted for the purpose of enhancing and developing language learning. Part 2 addresses novel assessment development and implementation projects, such as the formative use of task-based assessments, technology-mediated language performance assessment, validation of educational

placement tests for immigrant learners, and the use of assessment to help identify neurolinguistic correlates of proficiency. The final section of the book highlights examples of argument-based approaches to assessment and evaluation validation, extending this critical framework to quality assurance efforts in new domains. Adding to research on traditional and conventional uses of testing and evaluation in language education, this volume captures innovative trends in assessment and evaluation practice that explicitly aim to better inform and enhance language teaching and learning.

SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST The Net Generation Has Arrived. Are you ready for it? Chances are you know a person between the ages of 11 and 30. You've seen them doing five things at once: texting friends, downloading music, uploading videos, watching a movie on a two-inch screen, and doing who-knows-what on Facebook or MySpace. They're the first generation to have literally grown up digital--and they're part of a global cultural phenomenon that's here to stay. The bottom line is this: If you understand the Net Generation, you will understand the future. If you're a Baby Boomer or Gen-Xer: This is your field guide. A fascinating inside look at the Net Generation, Grown Up Digital is inspired by a \$4 million private research study. New York Times bestselling author Don Tapscott has surveyed more than 11,000 young people. Instead of a bunch of spoiled "screenagers" with short attention spans and zero social skills, he discovered a remarkably bright community which has developed revolutionary new ways of thinking, interacting, working, and socializing. Grown Up Digital reveals: How the brain of the Net Generation processes information Seven ways to attract and engage young talent in the workforce Seven guidelines for educators to tap the Net Gen potential Parenting 2.0: There's no place like the new home Citizen Net: How young people and the Internet are transforming democracy Today's young people are using

## File Type PDF Pengukuran Sikap Mia Azwar

technology in ways you could never imagine. Instead of passively watching television, the "Net Geners" are actively participating in the distribution of entertainment and information. For the first time in history, youth are the authorities on something really important. And they're changing every aspect of our society—from the workplace to the marketplace, from the classroom to the living room, from the voting booth to the Oval Office. The Digital Age is here. The Net Generation has arrived. Meet the future.

Introduction to Early Childhood Education provides current and future educators with a highly readable, comprehensive overview of the field. The underlying philosophy of the book is that early childhood educators' most important task is to provide a program that is sensitive to and supports the development of young children. Author Eva L. Essa and new co-author Melissa Burnham provide valuable insight by strategically dividing the book into six sections that answer the "What, Who, Why, Where, and How" of early childhood education. Utilizing both NAEYC (National Association for the Education of Young Children) and DAP (Developmentally Appropriate Practice) standards, this supportive text provides readers with the skills, theories, and best practices needed to succeed and thrive as early childhood educators.
