Practicing is a crucial part of learning a new language. Statistical languages like R are no exception of that rule. Many of my students think the same and would love to see more exercises. Therefore, I decided to write an R exercise sheet for beginners and blog it over here. These R exercises are an .

PROGRAMMING

EXERCISES FOR R

Make sure you try the

Access Free R Tutorial And

exercises, and

understand the code involved in each one; if something doesn't make sense, use R's help functions, ask a classmate, try using internet resources, or ask me for help (preferably in that order).

R Programming

Recall that a family of

Access Free R Tutorial And

solutions includes solutions to a differential equation that differ by a constant. For exercises 48 - 52, use your calculator to graph a family of solutions to the given differential equation. Use initial conditions from $y(t=0)=10$ to $y(t=0)=10$ increasing by 2 .
