This might be a new series being launched from the Whirlwind Series. In this story we have a luxury Space Liner on its maiden voyage. A hyperspace trap is sprung by aliens and the story begins. The book is well written. The basic idea of the story is ageless. I don't think the story is up to the usual Nuttall standard.

The maiden voyage of a huge space cruise ship is interrupted when pirates force the captain too near to what appears to be a hyperspace storm. The storm turns out to be a trap set by energy-feeding aliens.

Remove the necklace and change the iceberg for a hyperspace storm and we're talking about The Hyperspace Trap. Christopher Nuttall has a problem with his view of the reader - basically we are all a bit dim and can't follow the details of his plots. To this end we are repeatedly told key bits of information to ensure we understand.

The Hyperspace Trap, I unfortunately have to say, is not one of Christopher Nuttall's finest works. As a fan of the author's work, I felt somewhat disappointed in this story which felt laboured through the first half and only picked up in the last half of the book.

Once the hyperspace trap is sprung, the novel leaps forward with ever increasing excitement. Every character becomes valuable and it's not clear who, if anyone is going to survive.

Christopher G. Nuttall's novel of human fear and survival, set in the thrilling world of his Angel in the Whirlwind series. A year after the Commonwealth won the war with the Theocracy, the interstellar cruise liner Supreme is on its maiden voyage, carrying a host of aristocrats thrilled to be sharing in a wondrous adventure among the stars. The passengers include the owner and his daughters, Angela and Nancy. Growing up with all the luxuries in the world, neither sister has ever known true struggle, but that all changes when a collision with a pirate ship leaves the cruiser powerless and becalmed in hyperspace. And they're not alone. Now, the mysterious force that's living on this floating graveyard is coming for Supreme's crew and passengers. As madness starts to tear at their minds, they must fight to survive in a strange alien realm. And there's no way out...

They were trying out a new drive when a cosmic accident took them incalculable light years off course. A miracle of courage and astrogation meant that there were some survivors from the inevitable crash. The ship itself did not escape unscathed. What had been their vehicle became their prison. The buckled lock could not be opened from the inside and they had no other means of getting free. The air was slowly running out. The planet they had hit was raw and primitive by their own standards, but it did hold intelligent life. One of the natives found the ship. Dare the trapped space travellers hope for a miracle? If they go out what kind of strange life forms would they be involved with? Could they hope to find the kind of raw materials which would get their crippled ship into space again? If not, could they face life sentences on this strange, unknown, primitive world . . . ? Faced by a thousand fantastic difficulties the astronauts battled untiringly for their right to survive.

Do a little armchair time-travel, rub elbows with a four-dimensional intelligent life form, or stretch your mind to the furthest corner of an uncharted universe. With this astonishing guidebook, *Surfing Through Hyperspace*, you need not be a mathematician or an astrophysicist to explore the all-but-unfathomable concepts of hyperspace and higher-dimensional geometry. No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension. Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us. Yet this extra dimension has a very real, practical value to mathematicians and physicists who use it every day in their calculations. In the tradition of *Flatland*, and with an infectious enthusiasm, Clifford Pickover tackles the problems inherent in our 3-D brains trying to visualize a 4-D world, muses on the religious implications of the existence of higher-dimensional consciousness, and urges all curious readers to venture into "the unexplored territory lying beyond the prison of the obvious." Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind-expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security. This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. *Surfing Through Hyperspace* concludes with a number of puzzles, computer experiments and formulas for further exploration, inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain.

A killer virus called krytos makes its way across Coruscant, decimating the population and sowing seeds of rebellion

For fans of Firefly and James S. A. Corey's Expanse novels, The Firmament of Flame is the third installment in Drew Williams' Universe After series. For nearly a century, the Justified have been searching for gifted children to help prevent the return of the pulse. Until recently, they thought they were the only ones. Jane Kamali and her telekinetic protégé Esa, now seventeen, barely managed to claim victory against a Cyn—a being of pure energy—hell bent on hunting down the gifted. Now they face an army. The Cyn and their followers will stop at nothing to find Esa and the others. No one knows what they want, but Jane, Esa, and their allies in the Justified are determined to find out. Even if they have to go to the ends of the known universe to do it. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Rebels have taken the Imperial headquarters world of Coruscant, but their problems are far from over. A killer virus called Krytos is spreading among the population, and fomenting a counter-revolution, at the same time as the treason trial of Rebel hero Tycho Celchu. And X-wing pilot Corran Horn, given up for dead in "Iceheart"'s inescapable prison, discovers an extraordinary power in himself--the power of the Force! Features a bonus section following the novel that includes a primer on the Star Wars expanded universe, and over half a dozen excerpts from some of the most popular Star Wars books of the last thirty years!

The galaxy has been at war for a generation, locked in a conflict that has swept myriad star systems and claimed lives beyond counting. It has been nineteen years since a covert Human-Krellian research venture aimed at fighting a pan-galactic plague was brought to its knees by an act of terrorism so profound that the Krellian moon was destroyed and Krell itself was forever shifted in its orbit. A ruined but powerful race, the Krellians swore revenge on the Maristilian Alliance of Planetary Systems, whose leaders, it was said, had engineered the attack on their homeworld. The massacre of Samuel Zentasen (Chairman of the MAPS Chancellor) and his entire family aboard their personal shuttle, the Eagle, thirteen years ago was but a drop in a vast sea of atrocities. And though the facts of the notorious "Bloody Eagle" were much reported, one fact remained hidden; the youngest Zentasen was not killed, but rescued. Now a grown young man, Wesley Zentasen finds himself drawn into the heart of the great conflict with a dark and terrible secret in his blood that could change everything.
